

Apple Assistive Technology

Cognitive & Mobility

Spoken Content

- **Speak Screen** reads entire screen aloud.
- Control speech playback with **Speech Controller**.
- **Speak Selection** reads a specific range of text.
- **Highlight Content** highlights words or sentences as they're spoken.
- **Typing Feedback** speaks aloud each letter typed.
- In over 35 languages.

Available on: iPhone, iPad, Mac, iPod touch

Safari Reader

- Minimizes the sensory overload navigating the web can create.
- Strips away ads, buttons, and navigation bars, allowing you to focus on all the content you want — and none of the clutter.

Available on: iPhone, iPad, Mac, iPod touch

Dictation

- Talk where you would type
- If you have strong verbal skills, but your spelling or typing could use an assist, just go to any text field and tap the microphone button on the onscreen keyboard to start dictating.

Available on: iPhone, iPad, Mac, Apple Watch, Apple TV, iPod touch

DISABILITY RESOURCE CENTER

Wacheno Welcome Center WC180

Scribble

- Quickly jot letters that turn into text using finger or Apple Pencil.

Available on: iPad, Apple Watch

Screen Time

- Keeps an eye on screen use
- Gives a detailed breakdown of where time is spent, and **App Limits** let you set a specific time to spend in any app. This helps you identify patterns in usage and track improvement over time.

Available on: iPhone, iPad, Mac, iPod touch

Background Sounds

- Everyday sounds can be uncomfortable or annoying.
- Choose from balanced, bright, or dark noise or ocean, rain, and stream sounds to continuously play in the background and mask excess environmental or external noise.

Available on: iPhone, iPad, iPod touch

Switch Control

- Control your device with a variety of adaptive switch hardware, wireless game controllers or even simple sounds.
- For extensive motor limitations, use item, point and manual scanning to navigate sequentially through onscreen keyboards, menus and the dock.
- Use a single device to navigate any other devices synced with your iCloud account.

Available on: iPhone, iPad, Mac, Apple TV, iPod touch
